PROJECTS

E-Commerce Website

- Built an E-Commerce website from scratch, using **Express.js**, **Node.js**, **Bootstrap** and **MongoDB** with the **Handlebars** view engine.
- Key contributions include implementing **user authentication**, **admin functionality**, integrating the **Razorpay payment gateway**.
- Provided responsive **shopping cart** and **Cash on Delivery** option for enhanced user experience.

Personal Portfolio Website

- Built a personal portfolio website using **CSS** and **JSX** within the **React** framework.
- Integrated smooth animations with the **AOS** npm library and Implemented **Email.js** for contact functionality.

OLX Clone - Online Marketplace Platform

- Developed an OLX clone using the **React** framework, incorporating user authentication features such as **signup and login**.
- Implemented a '**Sell**' button to enable users to create product listings and Integrated **routing** to facilitate seamless navigation.
- Utilized **Firebase** as the backend database to store and manage product data.

Netflix Clone - Streaming Platform Replica

- Crafted a Netflix clone using **React**, integrated with **TMDB** for movie data.
- Utilized **Postman** for efficient API calls, ensuring smooth data integration.
- Incorporated the **YouTube** npm library to enhance video content integration.
